EXPERIENCE

Decision Point Security, Remote – Cyber Security Engineer

June 2026 - Present

Develop software tools and automation to streamline internal cybersecurity workflows and improve operational efficiency. Support security operations through scripting, troubleshooting, system analysis, and implementation of technical solutions across a variety of cybersecurity tasks.

micro1, Remote – AI Gameplay Systems Trainer

Mar 2026 - June 2026

Created gameplay-focused prompts, rubrics, and evaluation tasks for AI training workflows, translating design systems into clear, testable specifications and reviewing implementation quality across production-style scenarios.

AFRL Internship, Eglin AFB – Software Engineering Intern

May 2024 - August 2024

Modernized a legacy Python-based Blender plugin used in sensor-testing simulations, migrating from Blender 3.0 to 4.0+ and refactoring deprecated APIs. Improved system performance and enhanced thermal-property modeling tools used in early-stage defense simulation workflows. Operated within a secure research environment under Secret clearance.

Guckles Games, Pensacola – Game Developer

November 2023 - Present

Created and released a 3D multiplayer game to over 200,000+ players. Built state management logic, and performance optimized gameplay architecture within a 24,000+ line codebase. Led full lifecycle development including system design, debugging production issues, and managing live updates.

EDUCATION

University of West Florida

B.S Cybersecurity

Computer Science Minor

2026 | GPA: 3.41

CREDENTIALS

Active DoD Secret Clearance

CompTIA Security+

SKILLS

Languages: Python, C++, C#, Java, GDScript

Development: Git, GitHub, Blender, Steamworks API, Godot Engine

Technical: Linux, Windows, Real-Time Systems, Multiplayer Networking, Secure Development, Performance Optimization

ATHLETICS

NCAA Division II Cross Country & Track – 4 yrs

2x School Record Holder – 2K & 3K Steeplechase

Half Ironman Finisher
