EXPERIENCE

micro1, Remote – AI Gameplay Systems Trainer

Mar 2026 - Present

Created gameplay-focused prompts, rubrics, and evaluation tasks for AI training workflows, translating design systems into clear, testable specifications and reviewing implementation quality across production-style scenarios.

Guckles Games, Pensacola – Game Developer

November 2023 - Present

Designed and deployed a real-time, multiplayer networked application serving 200,000+ unique users. Engineered state management logic, and performance-optimized gameplay architecture within a 24,000+ line codebase. Led full lifecycle development including system design, debugging production issues, and managing live updates.

AFRL Internship, Eglin – Software Engineering Intern

May 2024 - August 2024

Modernized a legacy Python-based Blender plugin used in sensor-testing simulations, migrating from Blender 3.0 to 4.0+ and refactoring deprecated APIs. Improved system performance and enhanced thermal-property modeling tools used in early-stage defense simulation workflows. Operated within a secure research environment under Secret clearance.

EDUCATION

University of West Florida, Pensacola – Cybersecurity

August 2022 - May 2026

Graduated with a B.S. in Cybersecurity, earning a 3.41 GPA. Coursework emphasized network security, encryption, threat detection, Linux systems, malware analysis, and secure software design.

SKILLS

Programming: Python, C++, Java, GDScript

Systems & Platforms: Linux (CLI), Windows, Git, Networking Fundamentals

Software & Tools: GitHub, Steamworks API, Blender, Godot Engine

Concepts: Real-Time Systems, Multiplayer Networking, Secure Development, Performance Optimization

ACHIEVEMENTS

Active DoD Secret Clearance
(AFRL Internship – Eglin AFB)

Deployed real-time multiplayer application to 200,000+ users on Steam

Maintained and scaled a 24,000+ line production codebase

ATHLETICS

NCAA Division II Cross Country & Track (4 yrs)

2x School Record Holder (Steeplechase)
